EXPERIENCE

Task Meister, *(UbySolinap/Task-Manager)* ⧉
- A very straightforward and easy-to-use task manager website. User functionality like login, logout, register, and change password was managed through Flask-login library.
- Utilized SQLAlchemy library to set up relationships that will connect tasks to their equivalent users.
- Python Flask for the framework, HTML/CSS for the front-end, SQLite for the task, and user database.

King Lyrics, *(UbySolinap/Lyrics-Website)* ⧉
- Search engine website to find the lyrics of any song online. The main function was made possible by using the Requests library to initiate an HTTP request for the needed API.
- Relied on Musixmatch API for its system that fits the project's outcome and for its large database of song lyrics.
- Python Flask for the framework, HTML/CSS for the front-end, and Musixmatch developer for the API.

London's Aesthetic Cafés, *(UbySolinap/Cafe-Website)* ⧉
- Shows a list of available cafes and their key information around London. Each cafe's location is also embedded in its respective pages for convenience.
- The users can also suggest a cafe if they know one around London that is not currently on the list.
- Python Flask for the framework, HTML/CSS for the front end, SQLite for the cafe database, and Google My Maps for the cafe locations.

Filipino Finest - Online Restaurant, *(UbySolinap/Online-Restaurant)* ⧉
- An e-commerce website and restaurant type that displays its products in this case, Filipino foods, and allows the user to order online. The website also has user functionality and a database of available foods.
- Once the order is finalized, the customers will input their card details then Stripe API will handle the transaction of payment.
- Python Flask for the framework, HTML/CSS for the front-end, SQLite for the menu database, and Stripe API for the payment session.

SKILLS

- Back End Development | Python • Flask
- Front End Development | JavaScript • HTML • CSS • Bootstrap
- Database | SQLite • PostgreSQL
- IDE | PyCharm • Visual Studio Code
- Miscellaneous | Git • Github • Heroku • Microsoft Office• Windows

EDUCATION

Bachelor of Science in Computer Engineering,   2014 – 2019 | Caloocan City, Philippines
University of the East, Caloocan
